

Curriculum Vitae

Name: Rawan Ayman Sarhan
Date of Birth: 01 May 2002
Email: sarhrawan@gmail.com
Phone: 0954862737
Location: Damascus, Syria

Profile

Informatics Engineering student specialized in Software Engineering, passionate about backend development and system architecture. Experienced in building scalable systems using Microservices, Design Patterns, and Layered Architecture. Motivated to continuously improve technical and problem-solving skills and contribute to real-world distributed systems.

Education

Bachelor's Degree in Informatics Engineering – Software Engineering
Damascus University – 5th Year Student
Expected Graduation: 2026

Skills

- 1 **Programming & Web:** HTML, CSS, JavaScript (No specific framework)
- 2 Laravel – Good Experience
- 3 Node.js & Express – Good Experience
- 4 Java – Good Knowledge
- 5 C++ – Good Knowledge
- 6 **Software Engineering:** SDLC, Design Patterns, Microservices Architecture, Layered Architecture
- 7 **Databases:** MySQL
- 8 **Tools:** Git, GitHub, Jira
- 9 **Languages:** Arabic (Native), English (Intermediate)

Projects

Bank System – Microservices Architecture

GitHub: <https://github.com/rawansarhan/Bank>

- Applied Design Patterns in system architecture.
- Implemented Microservices Architecture for scalability and maintainability.
- Applied Layered Architecture for clean separation of concerns.

- Modular and service■based design.

Government Complaint Management System

GitHub: <https://github.com/rawansarhan/ComplaintMang>

- Implemented Layered Architecture for maintainability.
- Concurrency Control to prevent simultaneous edits by employees.
- Backup mechanisms for data safety.
- Local Load Balancing.
- Tracing for monitoring and debugging.
- Versioning for system updates.

Ghrass Platform – Node.js & Express

GitHub: <https://github.com/rawansarhan/Ghrass>

- Backend development using Node.js and Express.
- REST API structure and routing.
- Focus on clean code organization and server■side logic.

Event Management System – Laravel

GitHub: <https://github.com/rawansarhan/eventsMang>

- Full backend logic using Laravel framework.
- MVC structure and database integration.
- User and event management features.

Strengths

- 1 Strong problem■solving and analytical thinking
- 2 Understanding of distributed systems and architecture
- 3 Team collaboration and continuous learning
- 4 Commitment to writing clean and scalable code
